

This BoTemp newsletter contains the following topics:

- Nomination Rising Star Award 2017
 - Visit us between October 19 and 21 at the 'MobiliteitsRAI' in Amsterdam
 - We have moved
-

WE ARE PROUD

BoTemp has been nominated for an award. On September 12, Deloitte announced the ten companies that are nominated for the **Rising Star Award 2017**. We are among them. The Rising Star Award is a part of the Deloitte Technology Fast50 list, and focuses on companies less than five years old, with high sales potential, high levels of innovation, and scalability.

We are honored and proud. The quality of participants is high, and the nomination indicates that we are on the right track. On October 12, we will compete for the title: Rising Star 2017 or the Most Disruptive Innovator. Previous Rising Stars were Helloprint (2016), Bynder (2015) and SendCloud (2014).

LET'S MEET AT THE MOBILITEITSRAI IN AMSTERDAM

Today we are facing major technological challenges. We want our products to be socially acceptable, but they also need to be cost-efficient. At the MobiliteitsRAI, an event held in Amsterdam and the innovative successor of the BedrijfsautoRAI, you will find the answer.

MobiliteitsRAI

19-21 okt
2017

The MobiliteitsRAI will take place from 19 to 21 October 2017, and is a completely new business platform for all professionals in the mobility sector. Linking a three-day fair to a two-day congress program creates the moment and place to discuss the future for mobility issues.

We are also participating in this event and would love to meet you there. You will find us at the 'Mobiliteitstheater', where we will introduce ourselves along with several leading organizations in the business, such as TLN, Evofenedex and TKI Dinalog.

Admission is free. The exhibition can also be visited in the evening. On the event [website](#) you will find all the information you are looking for.

Register your (free) visit via this [link](#).

WE HAVE MOVED

As of October 1, we will be fully operational in our new facility in Rijen in the Netherlands. The new location is about 10 kilometers from our former address and meets our requirements even better. Address and directions can be found on our [website](#).

THE ADVANTAGES OF OUR SOLUTIONS IN SHORT:

Charging and usage of cold are disconnected from each other
Low Total Cost of Ownership

- No emissions
- No noise
- Low maintenance & repair costs
- Easy to operate
- Sustainable
- Eligible for subsidies
