

MEET KAREL, OUR NEW COLLEAGE

Hello, my name is Karel Evers. I recently started at BoTemp as R&D manager.

For me, challenge, professional competencies, and freedom are the most important factors to do my job properly. And by combining reasoning and doing, I can achieve the best and smartest solutions.

BoTemp has a dynamic and ambitious work method that suits me well. I am very much in favour of the open, productive spirit that I admire among my new colleagues. I believe it to be necessary in order to develop the best sustainable products for freeze and chill applications in the cold chain.

After 29 years of experience in the refrigeration industry, this job offers me a tremendous new challenge, in which I can use my knowledge and experience to improve and further develop the BoTemp applications.

I live near BoTemp in the city of Eindhoven, together with my partner Marion. My two children Annelore and Tom are exploring their way around the world. In my spare time, I like walking, cooking, travelling and motorcycling.

I look forward to working with you in the near future.
